LEWISBURG RIVER TOWN

COMMUNITY PLANNING FORUM

Lewisburg Is a River Town, But

- The borough has a minimal connection to the river
- Views of the river from riverbank parks are limited
- Cultural events struggle to incorporate or acknowledge the river
- There is one access ramp which has inadequate parking and a poor quality launch point.
- The various existing parks along the river are underdeveloped and under-utilized
- Pedestrian infrastructure peters out before reaching many of the riverfront sites
- The town appears to take the river for granted at best and ignore it at worst.
- In spite of all this, we aspire to do better!

Background

- After initial resident interest in improving connections to the river, some initial ideas were explored.
- Borough Council recommended the LNC pursue becoming an official River Town.
- The LNC engaged a variety of community leaders and stakeholders and worked to obtain designation.
- The next step is to get a clearer picture of our community priorities as a River Town.
- Let's consider some of the many ideas already in the mix and then add some more – from you.
